

3 April 1986

MEMORANDUM FOR THE RECORD

SUBJECT: Meeting with McLean Citizens Association - 2 April 1986

1. I spoke to the Board of Directors of the McLean Citizens Association (MCA) on 2 April 1986 to convey to them the results of the expanded set of design alternatives for Routes 123 and 193 roadway improvements that resulted from the 29 January 1986 Traffic Advisory Committee (TAC) meeting. I provided for the 40 or so citizens present at this meeting copies of the following documents for their review and retention, all of which are attached hereto:

Point paper presented to MCA on 2 April 86.

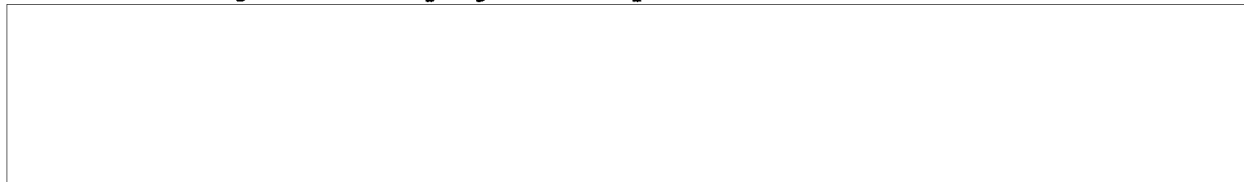

Letter to members of the Traffic Advisory Committee (TAC) dated 1 Apr 86, advising of 14 April TAC meeting.

Letter from President of MCA dated 27 March 86.

Paper titled, "Accommodations Made to Local Community Concerns Regarding Alterations to State of Virginia and Federal Roadways Resulting from Expansion to the CIA Headquarters Compound."

Paper titled, "History of Roadway Improvements Associated with the CIA Headquarters Compound Expansion."

2. I thought the meeting was quite successful, with the singular exception of the objections raised by Mr. Kent Maxfield and other members of the Ad Hoc Committee. As I explained to those present, the Agency has received and acted favorably upon some 40 to 50 citizen concerns over the course of the last two and one-half years of the roadway modification program. I added that while we regretted being unable to resolve in the Committee's favor the single remaining issue of the location of the Rt. 193 terminus at Rt. 123, we in the Agency nonetheless feel that the Traffic Advisory Committee process itself has been remarkably successful in addressing and satisfying community concerns.
